Subject: Addendum No. 2 to our Geotechnical Report Titled “Geotechnical Evaluation and Geologic Hazards Assessment Pool Deck, Solano Community College – Fairfield Campus
4000 Suisun Valley Road,
Fairfield, California 94534

Dear Mr. Ramos:

At the request of the Aquatic Design Group, Aedis Architects, Division of the State Architect’s (DSA) office we have prepared this Addendum No. 2 to our Geotechnical Report titled “Geotechnical Evaluation and Geologic Hazards Assessment Pool Deck, Solano Community College – Fairfield Campus, 4000 Suisun Valley Road, Fairfield, California”

The following are provided to address the comments:

- 10.1 Earthwork, Paragraph 2. The recommendation regarding scarifying the subgrade: “The exposed subgrade should then be scarified to a depth of 18 inches in areas to receive fill” does not apply to the new pool deck.
- The recommendations that compaction within 3 feet of the wall should be done with hand tampers, and that heavy mechanical equipment such as rollers should not be used within this 3-foot wide zone, still apply.

Please let us know if you need additional information.

Ninyo & Moore appreciates the opportunity to be of service to you on this project.

Respectfully submitted,
NINYO & MOORE
