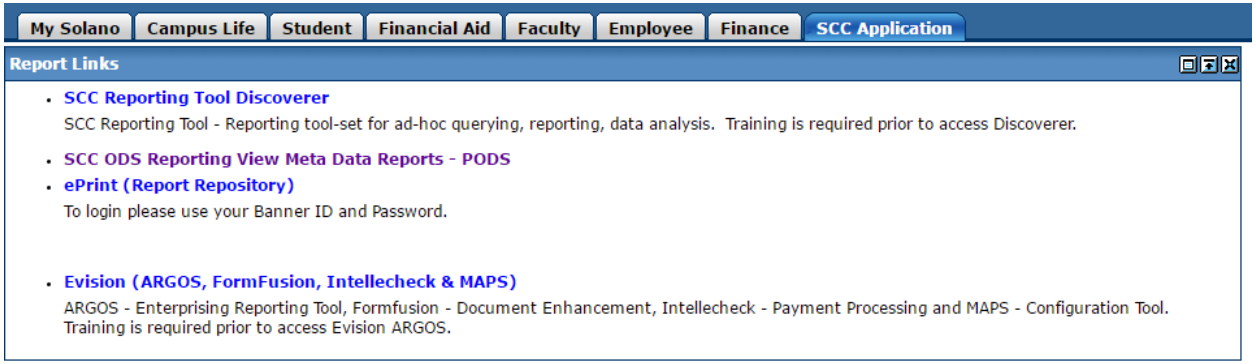
Argos Deans Data

Access

Either through

MySolano > SCC Application > Evision

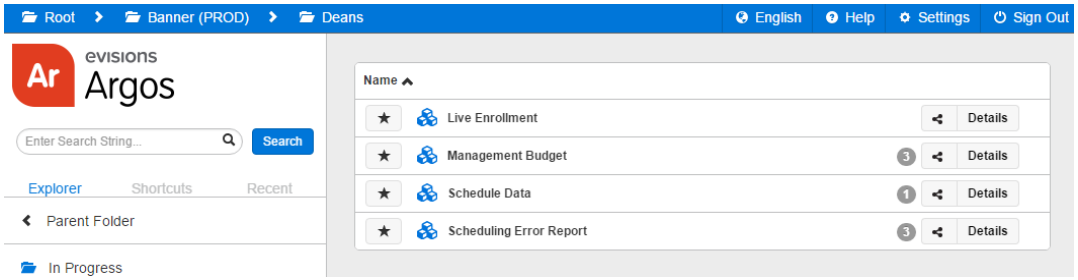


Or through this weblink

https://sierra/Argos/awv/#explorer/Banner%20(PROD)%00Deans

NOTE: *However you access you will likely get some sort of error messages or requests to update Java. I can't help with any of that, I have notified IT and there is no solution. I would recommend not updating java unless you want your Banner access cut off. I simply accept all of the security warning and continue.*

When you open the weblink you will see something like this;



The four available datasets are

- Live Enrollment: gives a quick picture of current and historic enrollments
- Management Budget: gives current and historic budget reports by org code
- Schedule Data: gives comprehensive current and historic schedule data
- Schedule Error Report: gives current and historic list of schedule errors and warnings
