

From the Aug. 2016 FlexCal Program:

**Eliminating Exit Points &  
Increasing Student Success**

**Building 1500, Room 1530 / Capacity 40**

Did you know that community college students beginning their math sequence with arithmetic have a less than 10% chance of persisting and succeeding through a transfer-level math course? We invite EVERYONE at Solano to come find out what the Math department is doing to address this. After a brief bit of information, participants will engage in a fun activity that is sure to give you at least one idea you could use in your classroom this semester!

*Corrine Kirkbride and Genele Rhoads*
