

2+1 STEM Scholarship

The 2+1 STEM Scholarship Program (**21SSP**), funded by the National Science Foundation (NSF) Scholarships in Science, Technology, Engineering, and Mathematics Program (S-STEM), is more than just financial support to help you get through the first two years of college.

The program also offers an array of college-provided student services and the support of a cohort of students that will ease your transition into college-level courses and on to a four-year university.

21SSP Scholars will receive annual financial support of approximately **\$3,000** per year, per student. ***This two-year scholarship at Solano will continue for an additional year at the four-year college of your choice, for you to continue to pursue your STEM studies.***

By participating in 21SSP, you will fund your own education with little or no debt, be more likely to earn high grades, and will be more likely to transfer to the university of your choice and graduate from that university with high grades.

For information about how to apply, go to our website:

The 2+1 STEM Scholarship at a Glance...

Program Description

The 2+1 STEM Scholarship Program (21SSP) is beginning its third year at Solano Community College, and will expand with this group of students in the Fall 2017 semester. The program is funded by the National Science Foundation (NSF) Scholarships in Science, Technology, Engineering, and Mathematics Program (S-STEM).

The purpose of the program is to support academically talented and financially needy students to attain an associate's degree in a STEM major and/or transfer to a four-year university. In addition to financial assistance, support services are built into the program to promote student success.

Application Information:
Check the website
www.solano.edu/21SSP
for information on how to apply.

Eligible Areas of Study

- Astronomy
- Biology
- Biotechnology
- Chemistry
- Computer Science
- Drafting & Design
