

Assessment Committee  
Minutes  
September 24, 2015—Room 305

Members Present: Kevin Anderson, Amy Dauffenbach, Richard Harris, LaNae Jaimez, Randy Robertson, Gene Thomas

Also Present: Peter Cammish

I. Agenda was approved as submitted.

II. Old Business

A. Update on new database: Argos or Curricunet.

Peter provided the SLO database design requirements ; copy attached. He stated that his office and IT were under a heavy workload and that it would be difficult to design an assessment database with Argos, though Argos can talk to Banner. Albeit Curricunet does not talk to Banner, the advantage was that it was already designed for assessments, but it would probably need some modifications. Discussion ended when the group decided that we should have a presentation to the Senate by Curricunet.

B. What courses should be used to assess GELOs and ILOs

Consensus emerged that course assessments should be used to assess GELOs and ILOs. There is still some concern about the wording of the new GELOs and ILOs by various constituencies on campus; but there is a need to assess these higher outcomes as they have only been assessed once before. LaNae pointed out that the Senate approved these outcomes with some concerns but that their assessments would be used to help modify them.

Meeting adjourned at 4 p.m.
