Driven by Industry Demand

Solano Community College re-established its automotive technician program in Spring 2013 to complement existing auto body and hybrid/alternative fuel programs.

Students will have the option to earn an Associate of Science Degree, or Certificate in the following:
- Powertrain
- Electronics
- Emissions
- Undercar
- Hybrid and Alternative Fuels

Curriculum will include:
- Suspension and Steering
- Electrical Systems and Electronics
- Brake Systems
- Engine Repair
- Engine Performance & Advance Performance
- Automatic Transmissions and Transaxles
- Manual Transmission, Transaxles & Drivetrain
- Heating and Air Conditioning
- Hybrid Auto Maintenance and Repair
- Alternative Fuel Vehicles
- Smog Technician Training
- Automotive Service Advising

Students will be trained to take the following ASE Certification Examinations:
- A1, A2, A3, A4, A5, A6, A7, A8, C1, & G1
- Plus State Smog Inspector & Smog Check Repair Technician License Examination

New Vallejo Facility

The SCC Auto Tech Program is moving into a leased facility in Vallejo:
- 16,000 sq. ft. building with space to grow the student enrollment
- Temporary location until permanent facility build at SCC Vallejo Campus

Snap-On Tools Partnership

The SCC Auto Tech Program is entering into a partnership with Snap-On Tools, as a part of the National Coalition of Certifications Center (NC3):
- Certification Center for Snap-On products (tools, diagnostic and wheel equipment, etc.)
- Provides SCC with software, curriculum, web-based training sessions, student tracking database, and promotional materials
