Automotive

Automotive Technician

Program Description
This program is designed to prepare graduates for entry level employment in the automotive industry as apprentice technicians, parts specialists, service consultants, or specialists in one of the many areas in the automotive service and repair industry.

Associate in Science Degree
The Associate in Science Degree can be obtained upon completion of the 45-unit major and Solano General Education - Option A. All courses in the major must be completed with a minimum grade of C or a P if the course is taken on a Pass/ No Pass basis.

Program Outcomes
Students who complete the Associate Degree will be technically proficient in entry level skills as defined by the National Automotive Technician’s Education Foundation (NATEF) by demonstrating:

1. Demonstrate the ability to properly service and repair automotive engines, automatic and manual transmissions and transaxles.
2. Demonstrate the ability to properly service and repair automotive brakes, steering and suspension systems.
3. Demonstrate the ability to properly service and repair automotive electrical, engine performance, HVAC and hybrid/alternative fuel vehicles.
4. Demonstrate effective workplace skills including oral and written communication and proper disposal and handling of hazardous waste materials

REQUIRED COURSES ................................................ Units
ATEC 070 Automotive Fundamentals ................... 3
ATEC 130 Automotive Suspension and Steering ........ 4
ATEC 131 Automotive Electrical Systems ............... 4
ATEC 132 Automotive Brake Systems ................... 4
ATEC 133 Automotive Engine Repair ..................... 4
ATEC 134 Automatic Transmissions/Transaxles ....... 4
ATEC 135 Automotive Engine Performance ............. 4
ATEC 136 Automotive Manual Drivetrain and Axles .... 4
ATEC 137 Automotive Heating and Air Conditioning .. 4
ATEC 138 Automotive Electronics ..................... 4
ATEC 139 Advanced Engine Performance ............... 4
ATEC 140 Hybrid Vehicle Maintenance and Repair ...... 2

Required Major Total Units ................................. 45

Solano General Education ....................................... 21
Electives (as needed to reach 60 units) ................. 0
Total Degree Units .............................................. 66

This is a Gainful Employment Program. For additional information, please visit http://www.solano.edu/gainful_employment/ and select “Automotive Technician.”
Automotive Automatic Transmissions and Transaxles

Program Description
This program is designed to prepare graduates for entry level employment in the automotive industry as an Automatic Transmission/Transaxle Service/Repair Technician.

Certificate of Achievement
A Certificate of Achievement in Automatic Transmissions and Transaxles can be obtained by completing the 17-unit major. All courses must be completed with a minimum grade of C or a P if the course is taken on a Pass/No Pass basis.

Program Outcomes
Students who complete the Certificate of Achievement in Automatic Transmissions and Transaxles shall have demonstrated and practiced:

1. Diagnose, remove, and repair automotive transmissions and transaxles
2. Utilize electrical diagnostic equipment and do hands-on testing with digital multi-meter
3. Safely work on and repair hybrid and alternative fuel vehicles

REQUIRED COURSES ................................................ Units
ATEC 070 Automotive Fundamentals ....................... 3
ATEC 131 Automotive Electrical Systems .................. 4
ATEC 134 Automatic Transmissions/Transaxles .......... 4
ATEC 138 Automotive Electronics ........................ 4
ATEC 140 Hybrid Vehicle Maintenance and Repair ...... 2

Total Units ........................................................................ 17

This is a Gainful Employment Program. For additional information, please visit http://www.solano.edu/gainful_employment/ and select “Automotive Automatic Transmissions and Transaxles.”

Automotive Electrical and Body Systems

Program Description
This program is designed to prepare graduates for entry level employment in the automotive industry as an Automotive Electrical/Electronics Service/Repair Technician.

Certificate of Achievement
A Certificate of Achievement in Automotive Electrical and Body Systems can be obtained by completing the 17-unit major. All courses must be completed with a minimum grade of C or a P if the course is taken on a Pass/No Pass basis.

Program Outcomes
Students who complete the Certificate of Achievement in Automotive Electrical and Body Systems shall have demonstrated and practiced:

1. Understand the theory of air conditioning and heating systems and how to properly repair automotive HVAC systems
2. Utilize electrical diagnostic equipment and do hands-on testing with digital multi-meter
3. Safely work on and repair hybrid and alternative fuel vehicles

REQUIRED COURSES ................................................ Units
ATEC 070 Automotive Fundamentals ....................... 3
ATEC 131 Automotive Electrical Systems .................. 4
ATEC 137 Automotive Heating and Air Conditioning ... 4
ATEC 138 Automotive Electronics ........................ 4
ATEC 140 Hybrid Vehicle Maintenance and Repair ...... 2

Total Units ........................................................................ 17

This is a Gainful Employment Program. For additional information, please visit http://www.solano.edu/gainful_employment/ and select “Automotive Electrical and Body Systems.”
Automotive

Automotive Maintenance and Light Repair

Program Description
This program is designed to prepare graduates for entry level employment in the automotive industry as apprentice technicians, lube technician, express service technician or parts specialist.

Certificate of Achievement
The Certificate of Achievement can be obtained by completing the 17-unit automotive major. All courses in the major must be completed with a minimum grade of C or a P if the course is taken on a pass-no pass basis.

Program Outcomes
Students who complete the Associate Degree will be technically proficient in entry level skills as defined by the National Automotive Technician’s Education Foundation (NATEF) by demonstrating:

1. Demonstrate proficiency in diagnosing and repairing automotive steering and suspension systems
2. Use electrical diagnostic equipment and do hands-on testing with a digital multi-meter
3. Proficiently diagnose, service, and repair automotive brake systems
4. Safely work on and repair hybrid and alternative fuel vehicles

ATEC 070     Automotive Fundamentals                   3.0 Units
Transferable to CSU
Hours: 32-36 lecture, 48-54 lab
Provides the knowledge and skills needed to prepare students for entry into the automotive core curriculum. The study of automotive industry fundamentals including careers, safety, fasteners, hand tool identification and usage, vehicle systems, electrical fundamentals, service information access and use, automotive chemical and fluid applications, hazardous waste handling, general shop equipment usage, and vehicle servicing. The course is designed in conjunction with Automotive Service Excellence (ASE) standards and subsequently will in part prepare the student for the ASE Maintenance and Light Repair G1 Certification Examination.

ATEC 130     Automotive Suspension and Steering        4.0 Units
Prerequisite: ATEC 070 with a minimum grade of C (may enroll concurrently)
Course Advisory: ATEC 131
Hours: 32-36 lecture, 96-108 lab
The study of automotive suspension and steering fundamentals including: Diagnosis, inspection, repair, and adjustment of modern automotive steering, suspension, supplemental restraint, tire pressure monitoring, and alignment systems. Theory of operation, common automotive steering and suspension systems, wheel alignment principles, methods of diagnosis, adjustment and repair, and the use of suspension service equipment will be covered. The course is designed in conjunction with Automotive Service Excellence (ASE) standards and subsequently will in part prepare the student for the ASE Suspension and Steering A4 Certification Examination.

<tr>
<td>Theory and principles of automotive electrical systems including basic electrical theory, Ohm’s Law, series and parallel circuits, electrical symbols and schematics, automotive batteries, charging systems, voltage regulation, starting systems, lighting systems, and various accessory systems. Laboratory will place emphasis on diagnosis and testing techniques required to effectively determine the necessary action in an electrical system failure. Use of schematics, technical specifications, voltmeters, ohmmeters, ammeters, and circuit testers will be required. The course is designed in conjunction with Automotive Service Excellence (ASE) standards and subsequently will prepare the student for the ASE Electrical / Electronic A6 Certification Examination.</td>

*C-ID Designation may change periodically visit c-id.net/courses/search for current designation or consult with your counselor*
**Hybrid Vehicle Maintenance and Repair**

ATEC 140  2.0 Units

**Hybrid Vehicle Maintenance and Repair**

**Prerequisite:** ATEC 070 with a minimum grade of C (may enroll concurrently)  
**Hours:** 32-36 lecture, 96-108 lab

Study of hybrid vehicles, safety issues associated with hybrid vehicles, maintenance and repair procedures specific to hybrid vehicles.

---

**Special Topics-Smog Check Level II**

ATEC 148B  1.0 Unit

**Special Topics - Smog Check Level II**

**Prerequisite:** ATEC 148A with a minimum grade of C  
**Hours:** 16-18 lecture, 8-9 lab

Level 2 - Smog Check Procedures Training. This training provides students the procedural knowledge, skills, and abilities needed to perform Smog Check inspections. This training is a minimum of 28 hours and must be completed at a BAR-certified school. The Smog Check Procedures Training must be completed by all Inspector candidates. To pass Level 2 training, a student must successfully complete a series of hands-on assessments and pass a written examination. Students who complete and pass this training will have met the Bureau's training requirements to qualify to take the Smog Check Inspector state licensing examination.

---

**Automotive**

---

**ATEC 137**

**Automotive Heating and Air Conditioning**

4.0 Units

**Prerequisite:** ATEC 070 with a minimum grade of C (may enroll concurrently)  
**Hours:** 32-36 lecture, 96-108 lab

Theory and operation of automotive heating systems and air conditioning refrigeration systems. Topics will include the refrigeration cycle, evacuation principles, humidity, heat transfer, automotive refrigerants, temperature pressure relationship, greenhouse gases, and proper handling and storage of refrigerants. Laboratory will focus on the diagnosis and repair of heating and cooling systems, use of refrigerant recycling-reclaiming equipment, use of evacuation equipment, retrofitting, and environmentally sound refrigeration handling techniques. The course is designed in conjunction with Automotive Service Excellence (ASE) standards and subsequently will prepare the student for the ASE A7 Air Conditioning and Heating Certification Examination.

---

**ATEC 138**

**Automotive Electronics**

4.0 Units

**Prerequisite:** A minimum grade of C in ATEC 070 and ATEC 131  
**Hours:** 32-36 lecture, 96-108 lab

Emphasis on applied techniques in schematic reading, scan tool usage and diagnosis of various automotive electronic systems, including power doors, mirrors, windows and seats; sun roofs; air bags; keyless entry; networks and other body control electronics. This course builds on the concepts introduced in Automotive Electrical Systems; is designed in conjunction with Automotive Service Excellence (ASE) standards and subsequently will in part prepare the student for the ASE Electrical / Electronic A6 Certification Examination.

---

**ATEC 139**

**Advanced Engine Performance**

4.0 Units

**Prerequisite:** A minimum grade of C in ATEC 070, ATEC 131 and ATEC 135  
**Hours:** 32-36 lecture, 96-108 lab

Emphasis on applied techniques in advanced engine performance systems diagnostics including fuel injection; ignition; emission controls; OBD II and CAN/BUS. The course is correlated with the National Institute for Automotive Service Excellence (ASE) standards and is designed to prepare the student for the ASE A8 and L1 Engine Performance Certification Examination series.

---

**ATEC 140**

**Hybrid Vehicle Maintenance and Repair**

2.0 Units

**Prerequisite:** ATEC 070 with a minimum grade of C (may enroll concurrently)  
**Hours:** 16-18 lecture, 48-54 lab

Study of hybrid vehicles, safety issues associated with hybrid vehicles, maintenance and repair procedures specific to hybrid vehicles.

---

**ATEC 148A**

**Special Topics-Smog Check Level I**

2.5 Units

**Prerequisite:** ATEC 138 with a minimum grade of C  
**Hours:** 32-36 lecture, 96-108 lab

The Engine and Emission Control Training is intended to provide students with fundamental knowledge of engine and emission control theory, design and operation. Students who successfully complete this training will have met the first step of the Bureau of Automotive Repair’s training requirements for inexperienced or minimally experienced candidates for the Smog Check Inspector license. The training is a minimum of 68 hours and must be completed at a Bureau of Automotive Repair (BAR) certified school. To pass Level 1 training, a student must successfully complete a series of hands-on assessments and pass a written examination. Experienced candidates may skip Level 1 training if they: Possess ASE A6, A8 and L1 certification; or possess an AA/AS Degree or Certificate in automotive technology and have 1 year experience; or have 2 years experience and have completed BAR specified diagnostic and repair training.

---

**ATEC 148B**

**Special Topics - Smog Check Level II**

1.0 Unit

**Prerequisite:** ATEC 148A with a minimum grade of C  
**Hours:** 16-18 lecture, 8-9 lab

Level 2 - Smog Check Procedures Training. This training provides students the procedural knowledge, skills, and abilities needed to perform Smog Check inspections. This training is a minimum of 28 hours and must be completed at a Bureau of Automotive Repair (BAR) certified school. The Smog Check Procedures Training must be completed by all Inspector candidates. To pass Level 2 training, a student must successfully complete a series of hands-on assessments and pass a written examination. Students who complete and pass this training will have met the Bureau’s training requirements to qualify to take the Smog Check Inspector state licensing examination.

---

**ATEC 150**

**Automotive Data Acquisition**

2.0 Units

**Prerequisite:** ATEC 140  
**Hours:** 32-36 lecture

Provides an understanding of OASIS (Online Automotive Service Information Systems) and the skills needed to adequately retrieve and apply automotive data, service procedures, and technical service bulletins. Includes the preparation of computer based repair orders and calculating repair estimates using web based service information providers.

---

**ATEC 151**

**Automotive Parts and Service**

3.0 Units

**Prerequisite:** ATEC 140  
**Hours:** 32-36 lecture, 48-54 lab

An introduction to the skills and knowledge utilized in the field of automotive parts and service consulting. This course offers preparation for the Automotive Service Excellence (ASE) C-1 and P-1 exam and certification. Topics include flow chart/diagnostic chart interpretation, parts removal/replacement, small group communication, and small business operations related to the automotive industry.
