

SOLANO COMMUNITY COLLEGE DISTRICT

PREREQUISITES, COREQUISITES, AND COURSE ADVISORIES

6023

PROCEDURES

Definitions

- Corequisite: There are two types of corequisites. The first is a course or equivalent preparation that must be taken concurrently with another course. The second is a course or equivalent preparation that may be completed before OR taken concurrently with another course. Both types of co-requisites are listed under “Prerequisites,” but the second type is followed by the parenthetical phrase “may be taken concurrently.” A student’s enrollment in a course with a co-requisite is blocked until the requirements of the co-requisite are satisfied.
- Prerequisite: A course or equivalent preparation that must be completed before enrolling in another course. A student’s enrollment in a course with a prerequisite is blocked until the requirements of the prerequisite are satisfied.
- Course advisory: A course or equivalent preparation that will broaden or deepen a student’s learning experience in a subsequent course. A student’s enrollment in a course with an advisory is not blocked for lack of the advisory skill.

I. Establishment of Prerequisites, Corequisites, and Course Advisories

A. Information in the Catalog and Schedule of Classes

The College shall provide the following explanations both in the College catalog and in the schedule of classes:

1. Definitions of prerequisites, corequisites and limitations on enrollment including the difference among them and the specific prerequisites, corequisites, and limitations on enrollment which have been established.
2. Procedures for a student to challenge prerequisites, corequisites and limitations on enrollment and circumstances under which a student may make such a challenge. The information about challenges will include the specific process including any deadlines, the various types of challenge that are established by law and any additional types of challenge permitted by the College.
3. Definition of course advisories, the right of a student to choose to take a course without meeting the advisory, and the provisions for exercising that right.

B. Process for Challenging Prerequisites and Corequisites

Any student who does not meet a prerequisite or corequisite or who is not permitted to enroll due to a limitation on enrollment, as defined in 2b, but who provides satisfactory evidence in support of the challenge may seek entry into the class as follows:

1. If space is available in a course when a student files a challenge to the prerequisite or corequisite, the District shall guarantee a seat for the student and resolve the challenge in a timely manner but not later than three (3) days prior to the beginning of the semester. If the challenge is upheld or the District fails to resolve the challenge in a timely manner, the student shall be allowed to enroll in the course. If no space is available in the course when a challenge is filed, the challenge shall be resolved prior to the beginning of registration for the next term, and if the challenge is upheld, the student shall be permitted to enroll, if space is available, when the student registers for that subsequent term.
2. Grounds for challenge shall include the following:
 - a. Those grounds for challenge specified in Sections 55201(f) of Title 5.
 - b. The student seeks to enroll and has not been allowed to enroll due to a limitation on enrollment established for a course that involves honor courses, intercollegiate competition or public performance, or one or more of the courses for which enrollment has been limited to a cohort of students. The student shall be allowed to enroll in such a course if otherwise he or she would be delayed by a semester or more in attaining the degree or certificate specified in his or her Individualized Educational Plan. (Students may not challenge on this basis if an appropriate alternative course that meets the degree or certificate requirement is available.)
 - c. The student's enrollment in a course, which has a prerequisite, or corequisite established to protect health and safety does not pose a danger to himself or herself or others.
3. The challenge process:
 - a. For challenges concerning academic qualifications, the initial determination should be made by an instructor who is knowledgeable about the course, who is qualified to teach in the discipline, but preferably not the instructor of the section in which the student wishes to enroll.
 - b. The student, who seeks enrollment in a course which has a prerequisite or corequisite established to protect health and safety, demonstrates to an instructor, but preferably not the instructor of the section, who is knowledgeable about the health and safety requirements of the course that the student does not pose a danger to himself or herself or others.

- c. If the student does not agree with the decision, the student has the right to appeal to an appeal committee. The appeal committee shall consist of the Division Dean, a counselor, and a member of the discipline faculty.
- d. The student must provide evidence as a basis for supporting the challenge. However, where information essential to the determination of whether the student's challenge should be upheld are or ought to be in the College's own records, then the College has the obligation to produce that information.

C. Curriculum Review Process

1. The Curriculum Committee and its membership have been established in a manner that is mutually agreeable to the College administration and the Academic Senate.
2. Prerequisites and corequisites will be established only upon the recommendation of the Curriculum Committee. Certain limitations on enrollment must be established in the same manner. (See II.C. below.)
3. Prerequisites, corequisites, and certain limitations on enrollment will be established only if:
 - a. The faculty in the discipline or, if the College has no faculty member in the discipline, the faculty in the division do all of the following:
 - (1) Approve the course; and,
 - (2) As a separate action, approve any prerequisite, and/or corequisite, only if:
 - (a) The prerequisite or corequisite is an appropriate and rational measure of a student's readiness to enter the course or program as demonstrated by a content review including all of the following:
 - i. Involvement of faculty with appropriate expertise;
 - ii. Consideration of course objectives by relevant discipline(s) to determine if the prerequisite or corequisite is required to achieve the objectives. (The curriculum review process should be done in a manner that is in accordance with accreditation standards.);
 - iii. Be based on a detailed course outline of record, related instructional materials, course format, type of examinations, and methods of student evaluation;
 - iv. Specification of the body of knowledge and/or skills which are deemed necessary at entry and/or concurrent with enrollment;
 - v. Identification of which courses develop and/or measure the skills identified under iv. above;

- vi. Matching of the knowledge and skills in the targeted course (identified under iv. above) and those developed or measured by the prerequisite or corequisite (identified under v. above); and
 - vii. Maintenance of documentation that the above steps were taken.
- (b) The prerequisite or corequisite meets the scrutiny specified in the section under "Levels of Scrutiny" (II.A), and specify which applies.
- (3) Approve any limitation on enrollment that is being established for an honors course or section, for a course that includes intercollegiate competition or public performance, or so that a cohort of students will be enrolled in two or more courses, and, in a separate action, specify which.
- (4) Approve that the course meets the academic standards required for degree-applicable courses, non-degree-applicable courses, non-credit courses, or community service, respectively.
- (a) Review the course outline to determine if a student would be highly unlikely to receive a satisfactory grade unless the student had knowledge or skills not taught in the course. If the student would need knowledge or skills not taught in the course itself, then the course may be approved for degree-applicable credit only if all requirements for establishing the appropriate prerequisite have been met.
 - (b) Review the course outline to determine whether receiving a satisfactory grade is dependent on skills in communication or computation. If receiving a satisfactory grade is sufficiently dependent on such skills, then the course may be approved for degree-applicable credit only if all requirements have been met for establishing a prerequisite or corequisite of not less than eligibility for enrollment to a degree-applicable course in English or mathematics, respectively.
 - (c) A course which should have a prerequisite or corequisite as provided in (a) or (b) above but for which one or more of the requirements for establishing a prerequisite have not been met may only:
 - i. Be reviewed and approved pursuant to the standards for non-degree-applicable credit, non-credit, or community service; or
 - ii. Be revised and reviewed as required to meet the criteria for establishing the necessary prerequisites or corequisites.

- b. The Curriculum Committee also reviews the course and prerequisite in a manner that meets each of the requirements specified in the faculty review section (I.C.3.a.(1)-(4).

D. Curriculum Review

As a regular part of the curriculum review process or at least every five years, the College shall review each prerequisite, corequisite, or advisory to establish that each is still supported by the faculty in the discipline or division and by the Curriculum Committee and is still in compliance with all other provisions of this policy and with the law. If the faculty and the Curriculum Committee disagree on continued support, the matter will be sent to the Academic Senate for resolution. Prerequisites or corequisites established between July 6, 1990, and October 31, 1993, shall be reviewed by July 1, 1996. Any prerequisite which is successfully challenged under subsections (1), (2) or (3) of Section 55201(f) shall be reviewed promptly thereafter to assure that it is in compliance with all other provisions of this policy and with the law.

E. Implementing Prerequisites, Corequisites, and Limitations on Enrollment

Implementation of prerequisites, corequisites, and limitations on enrollment must be done in a consistent manner and not left exclusively to the classroom instructor. Every attempt shall be made to enforce all conditions a student must meet to be enrolled in the class through the registration process so that a student is not permitted to enroll unless he or she has met all the conditions or has met all except those for which he or she has a pending challenge or for which further information is needed before final determination is possible of whether the student has met the condition.

F. Instructor's Formal Agreement to Teach the Course as Described

For all courses for which prerequisites or corequisites have been established, the College shall require that they be taught in accordance with the course outline, particularly those aspects of the course outline that are the basis for justifying the establishment of the prerequisite or corequisite. The process shall be established by consulting with the Academic Senate and, if appropriate, the bargaining unit. Pursuant to Section 55201 (b) (2) of Title 5.

II. Review of Individual Courses

If the student's enrollment in a course or program is to be contingent on his or her having met the proposed prerequisite(s) or corequisite(s), then such a prerequisite or corequisite must be established as follows. If enrollment is not blocked, then what is being established is not a prerequisite or corequisite but, rather, a course advisory and must be identified as such in the schedule and catalog. Establishing advisories does not require the following steps. (See II.B below.)

A. Prerequisites and Corequisites

1. Levels of Scrutiny

Prerequisites and corequisites must meet the requirements of at least one of the following subsections:

a. The Standard Prerequisites or Corequisites

The College may establish satisfactory completion of a course as prerequisite or corequisite for another course provided that, in addition to obtaining the review of the faculty in the discipline or department and the Curriculum Committee as provided above, the College specifies as part of the course outline of record at least three of the campuses of the University of California and the California State University which reflect in their catalogs that they offer the equivalent course with the equivalent prerequisite(s) or corequisite(s). Any combination of University of California campuses and California State University campuses is acceptable of to satisfy this requirement.

b. Sequential Courses Within or Across Disciplines

A course may be established as a prerequisite or corequisite for another course provided that, in addition to the review by faculty in the department or discipline and by the Curriculum Committee as described above, skills, concepts, and/or information taught in the first course are presupposed in the second course, and a list of the specific skills and/or knowledge a student must possess in order to be ready to take the second course is included in its outline of record.

c. Courses in Communication or Computation Skills

Prerequisites establishing communication or computational skill requirements may not be established across the entire curriculum unless established on a course-by-course basis. A course in communication or computation skills, or eligibility for enrollment in such a course, may be established as a prerequisite or corequisite for any course other than another course in communication or computation skills if, in addition to the review by the faculty in the discipline or department and by the curriculum committee as provided above, the following is also done:

- (1) A list of the specific skills a student must possess in order to be ready to take the course is included in the course outline of record; and
- (2) Research is conducted as provided in II.A.1.g.
- (3) For new courses, the prerequisite or corequisite may be established for a period of not more than two years while the research is being conducted. During this period, a determination must be made that a student who lacks the particular skills is highly unlikely to receive a satisfactory grade

because at least 25% of the grade is directly dependent on these skills. This determination must be approved both by the faculty in the discipline as provided in I.C.3.a and by the Curriculum Committee as provided in I.C.3.b and must be based on a review of the syllabus as well as samples of tests and other assignments on which the grade is based.

d. Cut Scores and Prerequisites

Whether or not research is required to establish a prerequisite, data collected to validate assessment instruments and cut scores is always relevant to reviewing the prerequisites for the associated courses. If such data are insufficient to establish the cut scores, any course prerequisites established for the same course or courses may not be printed in subsequent catalogs and schedules nor enforced in subsequent semesters until the problems are resolved, and sufficient data exist to establish the cut scores. In such a case, the collection of this data shall be done in the manner prescribed in II.A.1.g of this policy in addition to other requirements of law. Such a prerequisite may be changed to a course advisory while the problems are being resolved.

e. Programs

In order to establish a prerequisite for a program, the proposed prerequisite must be approved as provided for a course prerequisite in regard to at least one course that is required as part of the program.

f. Health and Safety

A prerequisite or corequisite may be established provided that, in addition to the review by faculty in the department or division and by the Curriculum Committee as provided above:

- (1) The course for which the prerequisite is proposed is one in which the student might endanger his or her own health and safety or the health and safety of others; and
- (2) The prerequisite is that the student possess what is necessary to protect his or her health and safety and the health and safety of others before entering the course.

g. Recency and Other Measures of Readiness

Recency and other measures of readiness may be established as a prerequisite or corequisite only if, in addition to the review by the faculty in the discipline or department and by the Curriculum Committee as provided above, the following is also done:

- (1) A list of the specific skills a student must possess in order to be ready to take the course is included in the course outline of record.

- (2) Data are gathered according to sound research practices in at least one of the following areas:
 - (a) The extent to which students, those currently enrolled in the course or those who have completed it, believe the proposed prerequisite or corequisite is necessary.
 - (b) Faculty members' appraisal of students' readiness for the course, comparing students who met the proposed prerequisite or corequisite with those who did not. The faculty appraisal could be done at any time after 50% of the semester is completed and based on independent assignments, quizzes and exams, participation in class, or other indicators that the student was or was not ready to take the course.
 - (c) At any point in the course, comparison of the performance of students who have met the proposed prerequisite or corequisite with the performance of those who have not.
 - (d) Comparison of student performance in the course to their scores on assessment instruments in the manner required to validate an assessment instrument and cut scores for the course in question as described in II.A.1.d.
- (3) The standard for any comparison done pursuant to II.A.1.(a)-(d) shall be that a student is highly unlikely to receive a satisfactory grade in the course unless the student has met the proposed prerequisite or corequisite. The research design, operational definition, and numerical standards, if appropriate, shall be developed by research personnel, discipline faculty, and representatives of the Academic Senate. If the evidence fails to meet the standard established, the College may establish the proposed prerequisite or corequisite as a course advisory and may seek to establish it as a prerequisite or corequisite only by following the process described in this policy and any applicable College policies.
- (4) If the Curriculum Committee has determined as provided in I.C.3.a.(4)(a) or (b) that a new course needs to have a prerequisite or corequisite, then the prerequisite or corequisite may be established for a single period of not more than two years while research is being conducted and a determination is being made, provided that:
 - (a) All other requirements for establishing the prerequisite or corequisite have already been met; and
 - (b) Students are informed that they may enroll in the course although they do not meet the prerequisite. However, students who lack the prerequisite may not constitute more than 20% of those enrolled in any section of the course.

- (c) Prerequisites and corequisites, which are exempt from review at the time they are, or were, established, as provided in Section 55201(d), are not eligible for this exception, and the research must be conducted during the five years before they must be reviewed. (See I.D. above.)

2. Additional Rules

Title 5, Section 55202 specifies additional rules which are to be considered part of this document as though reproduced here. (See attachment A.)

B. Course advisories

The College may recommend that a student meet a standard of readiness (course advisory) at entry only if recommended by the faculty in the discipline or division and by the Curriculum Committee.

C. Limitations on Enrollment

The types of limitation on enrollment specified below may only be established through the curriculum review process by the discipline or division faculty and the Curriculum Committee specified above, including the requirement to review them again at least every five years, as part of curriculum review. The following requirements must also be met in order to establish these particular limitations on enrollment.

1. Performance Courses

The College may establish audition or try-out as a limitation on enrollment for courses that include public performance or intercollegiate competition such as but not limited to band, orchestra, theater, competitive speech, chorus, journalism, dance and intercollegiate athletics provided that:

- a. For any certificate or associate degree requirement which can be met by taking this course, there is another course or courses which satisfy the same requirement; and
- b. The College includes in the course outline of record a list of each certificate or associate degree requirement that the course meets and of the other course or courses which meet the same requirement.
- c. Limitations on enrollment established as provided for performance courses shall be reviewed during curriculum review or at least every five years to determine whether the audition or try-out process is having a disproportionate impact on any historically under-represented group and, if so, a plan shall be adopted to seek to remedy the disproportionate impact. If disproportionate impact has been found, the limitation on enrollment may not be printed in subsequent catalogs or schedules nor enforced in any subsequent term until such a plan has been endorsed by the department and the College administration and put into effect. (See also Sections 55502(e) and 55512.)

2. Honors Courses

A limitation on enrollment for an honors course or an honors section of a course may be established if, in addition to the review by the faculty in discipline or division and by the Curriculum Committee as provided above, there is another section or another course or courses at the College which satisfy the same requirements. If the limitation is for an honors course and not only for an honors section, the College must also include in the course outline of record a list of each certificate or associate degree requirement that the course meets and of the other course or courses which meet the same associate degree or certificate requirement.

3. Blocks of Courses or Sections

Blocks of courses or blocks of sections of courses are two or more courses or sections for which enrollment is limited in order to create a cohort of students. Such a limitation on enrollment may be established if, in addition to review by the faculty in the discipline or division and by the Curriculum Committee as provided above, there is another section or another course or courses which satisfy the same requirement. If the cohort is created through limitations on enrollment in the courses rather than limitations on specific sections of courses, then the College must include in the course outline of record a list of each certificate or associate degree requirement that the course meets and of the other course or courses which satisfy the same associate degree or certificate requirement.
