Addendum # 01 – The following clarifications are provided based on questions received and must be added/considered when completing your submittal: Acknowledgement of receipt of this ADDENDUM is required in the proposal’s cover letter of introduction. Please clearly note the addendum date and number.

ITEM:

1. Mandatory Pre-Bid Meeting Sign-In Sheet (see attached).

2. Point of contact: For bidding and technical questions replace Karim Nassab with Scott Christie, schristie@swinerton.com. Reference: Invitation to Bid

3. Question/RFI: Would the District allow an A* or a C-10 License to bid as a General Contractor?

Answer: We reviewed this closely and also discussed with CSLB and confirmed that prime for this project does need to have A license. The amount and type of non-electrical work is not considered incidental, so a C-10 should not act as prime contractor.

4. Clarification: The District has submitted application and paid encroachment permit fees to the City of Vacaville for this project. Therefore, the contractor will not need to pay such fees, but will need to list itself as the contractor of record for the project and sign for encroachment permit and related city permits.

5. Clarification: Confirming that Section 00-52-13-1 (Agreement) paragraph 4, states contract time of completion as 136 calendar days from the date specified in the Notice to Proceed. Revise contract duration shown in Section 00-01-20 (List of Schedules – Milestone Dates) from 186 to 136 calendar days. Also note the Construction Start and Finish Dates shown on Milestone Dates are dependent on issue date of Notice to Proceed.

6. 00 43 36 Subcontractor listing – since this is a streets and highway project, revise the paragraphs that have the 0.5% threshold to read “in excess of one-half of one percent of the total bid or $10,000, whichever is greater”.

ADDENDUM TO RFP DOCUMENTS

ADDENDUM #01

SCCD RFP: #17-007

Project:
Solano Community College District
Vacaville Center Intersection Improvements

Date: March 23, 2017

9. Plans – replace Sheets SSP-1 and SSP-2, dated 2-28-2017 with attached Sheets SSP-1 and SSP-2, Revision 1, dated 3-22-17, which add slurry seal specification. Slurry seal shown on the plans (see CD-1), shall utilize Type II aggregate and quick setting PMCSQS-1h grade emulsion. Surface preparation shall include crack sealing.
### Please Write Clearly and Please Leave a Business Card

**DATE:** March 16, 2017  
**PROJECT:** SCCD – Vacaville Center Intersection Improvements Project  
**PROJECT No.:** #17-007  
**PLACE:** Solano Community College District  
2000 North Village Parkway (Vacaville Center Annex)  
Vacaville, CA 94688  
**TIME:** 2:00 PM

### 10-1.06 REMOVE ROADSIDE SIGN

The width of the roadside sign shall be 36 inches by 72 inches. If the width is less than 36 inches by 72 inches, the sign shall be replaced by one of the same or greater dimensions. The sign shall be replaced with new signage conforming to the provisions of Section 12-3.10, "Traffic Cones," of the Standard Specifications, and these Special Provisions, and the Project Plans.

When bituminous adhesive is used for pavement marker placement, traffic control during placement operations shall conform to the provisions of Section 10-1.03, "Temporary Traffic Control Devices," of the Standard Specifications and these Special Provisions, and the Project Plans.

When the roadside sign is not to be replaced, the entire sign post shall be removed. The sign post shall be reinstalled after the new sign has been placed. The sign post shall be reattached in the same location as the sign was originally located.

### 10-1.07 TEMPORARY PAVEMENT MARKINGS AND DELINEATION

Temporary pavement markings and delineation shall be specified in the Construction Specifications. The lining of the lanes shall be 60 inches wide, or as otherwise specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

Temporary pavement markings shall be approved by the Engineer and shall be installed using an approved marking method or as specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

### 10-1.08 PERMANENT PAVEMENT MARKINGS AND DELINEATION

Permanent pavement markings and delineation shall be specified in the Construction Specifications. The lining of the lanes shall be 60 inches wide, or as otherwise specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

Temporary pavement markings shall be approved by the Engineer and shall be installed using an approved marking method or as specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

### 10-1.09 PERMANENT PAVEMENT MARKINGS AND DELINEATION

Permanent pavement markings and delineation shall be specified in the Construction Specifications. The lining of the lanes shall be 60 inches wide, or as otherwise specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

Temporary pavement markings shall be approved by the Engineer and shall be installed using an approved marking method or as specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

### 10-1.09 PERMANENT PAVEMENT MARKINGS AND DELINEATION

Permanent pavement markings and delineation shall be specified in the Construction Specifications. The lining of the lanes shall be 60 inches wide, or as otherwise specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

Temporary pavement markings shall be approved by the Engineer and shall be installed using an approved marking method or as specified in the Project Plans. The lining shall be centered on the edge of the lanes and a minimum of 0.080 inches in thickness. The lining shall be installed using an approved marking method or as specified in the Project Plans.

CONSTRUCTION STANDARDS SECTION 2
ALTERNATE ROAD

12.4.4 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.5 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.6 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.7 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.8 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.9 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.10 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.11 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.12 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.13 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.14 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.15 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.16 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.17 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.18 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.19 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.20 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.21 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.22 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.23 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.24 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.25 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.26 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.27 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.28 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.29 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.30 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.

12.4.31 General. Paving, grading, and constructing alternate road shall be performed in accordance with Section 6-0220, Aggregate Base Course, of the City Standard Specifications and Standard Drawings.

12.4.32 Applicable Materials. Aggregate base course material shall conform to the City of Vacaville Standard Specifications for the materials listed in Table 1 below.

12.4.33 Construction Standards. Construction of the Alternate Road shall be in accordance with the construction standards specified in Table 2 below.
