This equipment is an extremely versatile utility vehicle that will allow the District to replace multiple similar devices rented for projects each year. Examples of equipment uses are as a field forklift at graduation, tall weed and grass clearing, field work on athletic fields, trenching, parking lot sweeping, earth work and moving, utility line excavation, boring, etc. It will save the District a great deal of time having the right tool available at all times to deal with both planned and unplanned work. It is also easily transportable and will be used at the Centers for work there as well.
