## *ACCJC Recommendations on Mission Statement*

---

### **Recommendation #1**

In order to meet the standards, the team recommends that the College modify its mission statement to identify its intended student population and its commitment to achieving student learning. The College should consistently use the same mission statement in all documents and publications. Additionally, the mission statement should be used by the college as a primary force in decisions made by the College. (Standards I.A.1-4, IV.B.1.b)
