• Enter the course name into the field. Then click "Create".

• Select the newly created course and click on "Start New Session".

• Pop up screen appears to let you know the base frequency code (AA is default) and instructions for students to set their iClicker 2 remotes to match the frequency. To change the base frequency code please see the next section "How to Change the Base Frequency Code". Click "Close" to accept and close the screen.

What is the hybridization of BCl₃?

- a) sp
- b) sp²
- c) sp³
- d) sp³d
- e) sp³d²
- A small menu will appear, indicating that polling can now take place (green border). Open up a question in PowerPoint.
- Instruct your students to turn on their iClicker 2 remote (provided) or sign in to their iClicker Reef (students pay a subscription to use their mobile devices as remotes)=

• Click on the button to start polling, the green border will turn red indicating polling is in progress. Note the timer (00:28) and the number "3" on far right, indicating the number of responses received.

01:13 3 What is the hybridization of BCl₃?

Multiple Choice <u>dı</u>

• Click on the icon to show the results chart. NOTE: while polling is still taking place, students can change their responses.

- Click on "Answer" to select the correct response, "B", this will prompt the correct response to turn green and all incorrect responses will be red (as shown).
- Click on to stop polling and advance to next question to continue.

How to Change the Base Frequency Code

Base Frequency Code can be changed to eliminate interferences where multiple bases are used in close proximity to each other

• At this screen click on "Settings".
