Unlocking/Locking Cabinet

*Note: If you do not have a smart cabinet key, please acquire a key from your Dean or Supervisor.*

- After use, please secure technology equipment inside the smart cabinet.
- After stowing the technology, the smart cabinet requires locking even if other classes are scheduled to arrive shortly.

Please do not store personal or non-technology equipment (i.e. papers, books, ...). Such items congest the cabinet. In addition, equipment may become damage or cables disconnected.
