If you purchased a Dell™ n Series computer, any references in this document to Microsoft® Windows® operating systems are not applicable.
System Setup

Dell™ Latitude™ E6410/E6410 ATG Service Manual

- Entering System Setup
- Boot Menu
- Navigation Keystrokes
- System Setup Menu Options

Your computer offers the following BIOS and System Setup options:

- Access System Setup by pressing <F2>
- Bring up a one-time boot menu by pressing <F12>
- Access the Intel® AMT settings by pressing <Ctrl> + <P>

Entering System Setup

Press <F2> to enter System Setup and make changes to user-definable settings. If you have trouble entering System Setup using this key, press <F2> when the keyboard lights first flash.

Boot Menu

Press <F12> when the Dell logo appears to initiate a one-time boot menu with a list of the valid boot devices for the computer. Diagnostics and Enter Setup options are also included in this menu. The devices listed on the boot menu depend on the bootable devices installed in the computer. This menu is useful when you are attempting to boot to a particular device or to bring up the diagnostics for the computer. Using the boot menu does not make any changes to the boot order stored in the BIOS.

Navigation Keystrokes

Use the following keystrokes to navigate System Setup screens.

<table>
<thead>
<tr>
<th>Action</th>
<th>Keystroke(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exit BIOS</td>
<td>&lt;Esc&gt; or click Exit</td>
</tr>
<tr>
<td>Apply a setting</td>
<td>Click Apply</td>
</tr>
<tr>
<td>Reset defaults</td>
<td>Click Load Defaults</td>
</tr>
<tr>
<td>Expand and collapse field</td>
<td>&lt;Enter&gt;</td>
</tr>
</tbody>
</table>

System Setup Menu Options

The following tables describe the menu options for the System Setup program.

<table>
<thead>
<tr>
<th>General</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>System Information</td>
<td>This section lists the primary hardware features of your computer. There are no configurable options in this section.</td>
</tr>
<tr>
<td>Battery Information</td>
<td>Displays the status of the battery and the type of AC adapter connected to the computer.</td>
</tr>
<tr>
<td>Boot Sequence</td>
<td>Specify the order in which the computer attempts to find an operating system.</td>
</tr>
<tr>
<td>Date/Time</td>
<td>Displays current date and time settings.</td>
</tr>
</tbody>
</table>

**NOTE:** System Configuration contains options and settings related to integrated system devices. Depending on your computer and installed devices, the items listed in this section may or may not appear.

<table>
<thead>
<tr>
<th>System Configuration</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Integrated NIC</td>
<td>Allows you to configure the integrated network controller. The options are: Disabled, Enabled, and Enabled w/PXE. Default Setting: Enabled w/PXE.</td>
</tr>
<tr>
<td></td>
<td>Allows you to configure the parallel port on the docking station. The options are: Disabled, AT, PS2, and ECP.</td>
</tr>
</tbody>
</table>
### Parallel Port
Default Setting: ECP

### Serial Port
Allows you to configure the integrated serial port. The options are: Disabled, COM1, COM2, COM3, and COM4
Default Setting: COM1

### SATA Operation
Allows you to configure the internal SATA hard drive controller. The options are: Disabled, ATA, AHCI, and RAID On
Default Setting: RAID On

### Miscellaneous Devices
Allows you to enable or disable the following devices:
- Internal Modem
- Module Bay
- ExpressCard or PC Card
- Media Card, PC Card and 1394
- External USB Port
- Microphone
- eSATA Ports
- Hard Drive Free Fall Protection
- Camera and Microphone
Default setting: All enabled.

### Latitude ON™ Reader
Allows you to configure the operating mode of the Latitude ON Reader. The options are: Disabled and Enabled
Default Setting: Enabled

### Keyboard Illumination
Allows you to configure the keyboard illumination feature. The options are: Disabled, Auto ALS and Input, and Auto Input Only
Default Settings: Disabled

### Video
<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ambient Light Sensor</td>
<td>To enable the Ambient Light Sensor, select the Ambient Light Sensor check box.</td>
</tr>
<tr>
<td></td>
<td>Default Settings: Disabled</td>
</tr>
<tr>
<td>LCD Brightness</td>
<td>Allows you to set the display brightness depending up on the power source (On Battery and On AC).</td>
</tr>
</tbody>
</table>

### Security
<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Admin Password</td>
<td>Allows you to set, change, or delete the administrator (admin) password. When set, the admin password enables several security features including:</td>
</tr>
<tr>
<td></td>
<td>- Restricts changes to the settings in Setup</td>
</tr>
<tr>
<td></td>
<td>- Restricts the boot devices listed in the &lt;F12&gt; Boot Menu to those enabled in the &quot;Boot Sequence&quot; field</td>
</tr>
<tr>
<td></td>
<td>- Prohibits changes to the owner and asset tags</td>
</tr>
<tr>
<td></td>
<td>- Substitutes for the system and hard drive password</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> You must set the admin password before you set the system or hard drive password.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> Successful password changes take effect immediately.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> Deleting the admin password automatically deletes the system password as well.</td>
</tr>
<tr>
<td></td>
<td>Default Setting: Not Set</td>
</tr>
<tr>
<td>System Password</td>
<td>Allows you to set, change, or delete the system password. When set, your computer requests you to enter the system password every time your computer turns on or restarts.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> Successful password changes take effect immediately.</td>
</tr>
<tr>
<td></td>
<td>Default Setting: Not Set</td>
</tr>
<tr>
<td>Internal HDD Password</td>
<td>This field lets you set, change, or delete the password on the system's internal hard disk drive (HDD). Successful changes take place immediately and require a system restart. The HDD password travels with the hard drive, so the HDD is protected even when installed in another system.</td>
</tr>
<tr>
<td></td>
<td>Default Setting: Not Set</td>
</tr>
<tr>
<td>Password Bypass</td>
<td>Allows you to bypass the system and internal hard drive password prompts when your computer restarts or resumes from standby.</td>
</tr>
<tr>
<td></td>
<td>You can set Password Bypass to Disabled and Reboot Bypass.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> You cannot bypass the system or hard drive password when you turn on your computer that has been shut down.</td>
</tr>
<tr>
<td></td>
<td>Default Setting: Disabled</td>
</tr>
<tr>
<td>Password Change</td>
<td>Allows you to enable the disable permission to the System and Hard Drive passwords when the admin password is set.</td>
</tr>
<tr>
<td></td>
<td>Default Setting: Allow Non-Admin Password Changes checked</td>
</tr>
<tr>
<td>Strong Password</td>
<td>Allows you to enable or disable the Trusted Platform Module (TPM) on the computer.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> Disabling this option does not change any settings you may have made to the TPM, or delete any information or keys you may have stored there.</td>
</tr>
<tr>
<td></td>
<td>Default Setting: Disabled</td>
</tr>
</tbody>
</table>
### TPM Security
When TPM is enabled, the following options are available:
- **Deactivate**—Disables the TPM. The TPM restricts access to the stored owner information and does not execute any commands that use TPM resources.
- **Activate**—Enables and activates the TPM.
- **Clear**—Cleans the owner information stored in the TPM.

Default Setting: **Disabled**

### Computrace
Allows you to enable or disable the optional Computrace software. The options are **Deactivate**, **Disable**, and **Activate**.

**NOTE:** The **Activate** and **Disable** options will permanently activate or disable the feature and no further changes will be allowed.

Default Setting: **Deactivate**

### CPU XD Support
Allows you to enable or disable the Execute Disable mode of the processor.

Default setting: **Enabled**

### Non-Admin Setup Changes
Allows you to determine whether changes to the setup options are allowed when an Administrator Password is set. If disabled, the setup options are locked by the admin password.

### Password Configuration
Allows you to determine the minimum and maximum length of Administrator and System passwords.

### Admin Setup Lockout
Allows you to prevent users from entering Setup when an Administrator password is set.

### Performance

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Multi Core Support</strong></td>
<td>Enables or disables multi-core support for the processor. Setting options are: All, 1, and 2</td>
</tr>
<tr>
<td><strong>Intel® SpeedStep™</strong></td>
<td>Enables or disables the Intel SpeedStep feature.</td>
</tr>
<tr>
<td><strong>Intel® TurboBoost™</strong></td>
<td>Enables or disables the Intel TurboBoost performance.</td>
</tr>
</tbody>
</table>

### Power Management

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AC Behavior</strong></td>
<td>Allows you to enable or disable the computer from turning on automatically when an AC adapter is connected.</td>
</tr>
<tr>
<td><strong>Default Setting</strong>: Wake on AC Disabled</td>
<td></td>
</tr>
<tr>
<td><strong>Auto On Time</strong></td>
<td>Allows you to set the time at which the computer must turn on automatically. You can set the of days, if any, when you would like the system to turn on automatically. The settings are <strong>Disabled</strong>, <strong>Everyday</strong>, or <strong>Weekdays</strong>.</td>
</tr>
<tr>
<td><strong>Default Setting</strong>: Disabled</td>
<td></td>
</tr>
<tr>
<td><strong>USB Wake Support</strong></td>
<td>Allows you to enable or disable the ability of USB devices to wake the computer from Standby. This feature is only functional when the AC power adapter is connected. If the AC power adapter is removed during Standby, the BIOS will remove power from all of the USB ports to conserve battery power.</td>
</tr>
<tr>
<td><strong>Default Setting</strong>: Disabled</td>
<td></td>
</tr>
<tr>
<td><strong>Wake on LAN/WLAN</strong></td>
<td>Allows the computer to turn on by a special LAN signal or from Hibernate state when triggered by a special wireless LAN signal. Wake-up from the Standby state is unaffected by this setting and must be enabled in the operating system.</td>
</tr>
<tr>
<td><strong>Disabled</strong> — Do not allow the system to power on when it receives a wake-up signal from the LAN or wireless LAN.</td>
<td></td>
</tr>
<tr>
<td><strong>LAN Only</strong> — Allow the system to be powered on by special LAN signals.</td>
<td></td>
</tr>
<tr>
<td><strong>WLAN Only</strong> — Allow the system to be powered on by special WLAN signals.</td>
<td></td>
</tr>
<tr>
<td><strong>LAN or WLAN</strong> — Allow the system to be powered on by special LAN or wireless LAN signals.</td>
<td></td>
</tr>
<tr>
<td><strong>Default Setting</strong>: Disabled</td>
<td></td>
</tr>
<tr>
<td><strong>ExpressCharge</strong></td>
<td>Allows you to enable or disable the ExpressCharge feature.</td>
</tr>
<tr>
<td><strong>NOTE</strong>: ExpressCharge may not be available for all batteries.</td>
<td></td>
</tr>
<tr>
<td><strong>Charger Behavior</strong></td>
<td>Allows you to enable or disable the battery charger. If disabled, the battery will not lose power when the system is connected to an AC adapter but it will not charge either.</td>
</tr>
<tr>
<td><strong>Default Setting</strong>: ExpressCharge</td>
<td></td>
</tr>
</tbody>
</table>

### POST Behavior

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Adapter Warnings</strong></td>
<td>Allows you to enable or disable the BIOS warning messages when you use certain power adapters. The BIOS displays these messages if you attempt to use a power adapter that has too little capacity for your configuration.</td>
</tr>
<tr>
<td><strong>Default setting</strong>: Enabled</td>
<td></td>
</tr>
<tr>
<td><strong>Keypad (Embedded)</strong></td>
<td>Allows you to select one of two methods to enable the keypad that is embedded in the internal keyboard.</td>
</tr>
<tr>
<td><strong>Fn Key Only</strong> — The keypad is only enabled when you hold down the &lt;Fn&gt; key.</td>
<td></td>
</tr>
<tr>
<td><strong>By Numlock</strong> — The keypad is enabled when (1) the Num Lock LED is ON and (2) no external keyboard is attached. Note that the system might not notice immediately when an external keyboard is detached.</td>
<td></td>
</tr>
</tbody>
</table>
**NOTE:** When Setup is running, this field has no effect—Setup works in the **Fn Key Only** mode.

Default setting: **Fn Key Only**.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mouse/Touchpad</td>
<td>Allows you to select one of two methods to use pointing devices.</td>
</tr>
</tbody>
</table>
|                   | - **Serial Mouse** — Disable the integrated touch pad when an external Serial mouse is present.  
                   | - **PS/2 Mouse** — Disable the integrated touch pad when an external PS/2 mouse is present.  
                   | - **Touchpad-PS/2** — Leave the integrated touch pad enabled when an external PS/2 mouse is present.  |
| Default setting:  | **Touchpad-PS/2**.                                                          |
| Numlock LED       | Allows you to enable or disable the Num Lock LED when the computer boots.   |
| Default setting:  | **Enabled**.                                                                |
| USB Emulation     | Defines how the BIOS handles the USB devices. USB emulation is always enabled during POST.  |
| Default setting:  | **Enabled**.                                                                |
| Fn Key Emulation  | Allows you to use the `<Scroll Lock>` key on an external PS/2 keyboard the same way you use the `<Fn>` key on the computer's internal keyboard.  |
| NOTE:             | USB keyboards cannot emulate the `<Fn>` key if you are running an ACPI operating system such as Microsoft® Windows® XP. USB keyboards will only emulate the `<Fn>` key in non-ACPI mode (for example, when you are running a DOS).  |
| Default setting:  | **Enabled**.                                                                |
| Fast Boot         | Allows you to enable or disable the Fast Boot feature. The following options are available:  |
|                   | - **Minimal** — Boot quickly unless the BIOS has been updated, memory changed, or the previous POST did not complete.  
                   | - **Thorough** — Do not skip any steps in the boot process.  
                   | - **Auto** — Allow the operating system to control this setting (this works only when the operating system supports Simple Boot Flag).  |
| Default setting:  | **Minimal**.                                                                |
| Intel® Fast Call for Help | Used in conjunction with iAMT 4.0. Allows users to initiate contact with a management console while residing outside of the corporate infrastructure (i.e. remote location, behind a firewall or NAT, etc.) Use the check box to enable or disable this feature.  |
| Default setting:  | **Disabled**.                                                                |

### Virtualization Support

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>

Dell™ Latitude™ E6410/E6410 ATG Service Manual

- Device Status Lights
- Battery Status Lights
- Battery Charge and Health
- Keyboard Status Lights
- LED Error Codes

Device Status Lights

- Turns on when you turn on the computer and blinks when the computer is in a power management mode.
- Turns on when the computer reads or writes data.
- Turns on steadily or blinks to indicate battery charge status.
- Turns on when wireless networking is enabled.
- Turns on when a card with Bluetooth® wireless technology is enabled. To turn off only the Bluetooth wireless technology function, right-click the icon in the system tray and select Disable Bluetooth Radio.

Battery Status Lights

If the computer is connected to an electrical outlet, the battery light operates as follows:

- Alternately blinking amber light and blue light — An unauthenticated or unsupported, non-Dell AC adapter is attached to your laptop.
- Alternately blinking amber light with steady blue light — Temporary battery failure with AC adapter present.
- Light off — Battery in full charge mode with AC adapter present.
- Blue light on — Battery in charge mode with AC adapter present.

Battery Charge and Health

To check the battery charge, press and release the status button on the battery charge gauge to illuminate the charge-level lights. Each light represents approximately 20 percent of the total battery charge.

For example, if four lights are on, the battery has 80 percent of its charge remaining. If no lights appear, the battery has no charge.

To check battery health using the charge gauge, press and hold the status button on the battery charge gauge for at least 3 seconds. If no lights appear, the battery is in good condition and more than 80 percent of its original charge capacity remains. Each light represents incremental degradation. If five lights appear, less than 60 percent of the charge capacity remains, and you should consider replacing the battery.

Keyboard Status Lights

The green lights located above the keyboard indicate the following:

- Turns on when the numeric keypad is enabled.
- Turns on when the Caps Lock function is enabled.
- Turns on when the Scroll Lock function is enabled.

LED Error Codes

The following table shows the possible LED codes that may display in a no-POST situation.

<table>

Removing the Access Panel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Loosen the captive screw that secures the access panel to the base of the computer.
5. Slide the access panel toward the front of the computer.
6. Lift and remove the access panel off of the computer.

Replacing the Access Panel

To replace the access panel, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.
WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

Removing the ATG Port Cover

1. Follow the procedures in Before Working Inside Your Computer.
2. Pry and remove the ATG port cover away from the base of the computer.

Replacing the ATG Port Cover

To replace the ATG port cover, perform the above steps in reverse order.

NOTE: You may need to install Adobe® Flash® Player from Adobe.com in order to view the illustrations below.
Battery

Removing the Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Slide the battery latches toward the center of the computer.
3. Slide the battery out of the computer and remove it.

Replacing the Battery

To replace the battery, perform the above steps in reverse order.

NOTE: You may need to install Adobe® Flash® Player from Adobe.com in order to view the illustrations below.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.
Removing the Bluetooth Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the SIM card.
5. Remove the SD card.
6. Remove the ExpressCard.
7. Remove the Smart card.
8. Remove the hinge covers.
9. Remove the access panel.
10. Remove the optical drive.
11. Remove the hard drive.
12. Remove the LED cover.
13. Remove the keyboard.
14. Remove the coin-cell battery.
15. Remove the memory.
16. Remove the WWAN card.
17. Remove the WLAN card.
18. Remove the Latitude ON™ Flash/CMG module.
19. Remove the Fingerprint Reader.
20. Remove the Heat Sink and Processor Fan.
21. Remove the screw that secures the Bluetooth card to the computer.
22. Disconnect the Bluetooth cable from the computer.

Replacing the Bluetooth Card

To replace the Bluetooth card, perform the above steps in reverse order.
Removing the Camera

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the display bezel.
4. Loosen the captive screw that secures the camera to the computer.
5. Remove the camera from the slot on the computer.
6. Disconnect the data cable to remove the camera from the computer.

Replacing the Camera

To replace the camera, perform the above steps in reverse order.
Removing the ExpressCard Cage

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the Memory Card.
5. Remove the ExpressCard.
6. Remove the access panel.
7. Remove the hinge covers.
8. Remove the LED cover.
9. Remove the keyboard.
10. Remove the palm rest.
11. Remove the fingerprint reader.
12. Remove the Heat Sink and Processor fan.
13. Remove the display assembly.
14. Remove the optical drive.
15. Remove the screws that secures the ExpressCard cage to the computer.
16. Lift the ExpressCard cage and slide the ExpressCard cage out of the computer.

Replacing the ExpressCard Cage

To replace the ExpressCard cage, perform the above steps in reverse order.
WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

Removing the Coin-cell Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the access panel.
5. Disconnect the coin-cell battery cable from the system board.
6. Lift and remove the coin-cell battery out of its socket.

Replacing the Coin-cell Battery

To replace the coin-cell battery, perform the above steps in reverse order.
Removing the Display Assembly

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG port cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the hinge covers.
5. Remove the access panel.
6. Disconnect and unthread the antennae cable from the WLAN and/or WWAN card.
7. Disconnect and unthread the touch screen cable from the system board. (Only applies to E6410 ATG computer).
8. Loosen the captive screws that secure the display cable to the system board.
9. Disconnect and unthread the display data cable from the system board.
10. Remove the screws that secure the display assembly to the computer.
11. Lift and remove the display assembly from the computer.

Replacing the Display Assembly

To replace the display assembly, perform the above steps in reverse order.
Removing the Display Bezel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Starting from the bottom, gently pry the display bezel inside out from the display assembly using a plastic scribe.
4. When all the snaps loosen, remove the display bezel from the display assembly.

Replacing the Display Bezel

To replace the display bezel, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.
Removing the Display Panel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the Display Bezel.
5. Remove the screws that secure the display panel to the display assembly.
6. Remove the display panel from the top cover and lay it face down on the palm rest.
7. Disconnect the touch screen cable (1), and EDP cable (2), from the LCD panel.
8. Disconnect the touch screen cable if present.
9. Remove the display panel.
10. Remove the screws that secure the left display bracket to the display panel.
11. Remove the screws that secure the right display bracket to the display panel.

Replacing the Display Panel

To replace the display panel, perform the above steps in reverse order.
Removing the ExpressCard

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Press and release the card eject button.
4. Press the card eject button to release the card.
5. Remove the card out of the computer.

Replacing the ExpressCard

To replace the ExpressCard, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

NOTE: You may need to install Adobe® Flash® Player from Adobe.com in order to view the illustrations below.
Removing the Processor Fan

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the access panel.
5. Disconnect the processor fan cable from the system board.
6. Remove the screws that secure the processor fan onto the heat sink.
7. Remove the processor fan from the computer.

Replacing the Processor Fan

To replace the processor fan, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.
Removing the Fingerprint Reader

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the optical drive.
5. Remove the access panel.
6. Remove the LED cover.
7. Remove the keyboard.
8. Loosen the single captive screw (labeled "F") on the bottom of the computer, securing the fingerprint reader.
9. Disconnect the fingerprint reader data cable from the system board.
10. Peel off the Mylar to release the cable and fingerprint reader from the computer to remove the fingerprint reader.

Replacing the Fingerprint Reader

To replace the fingerprint reader, perform the above steps in reverse order.
Removing the Hard Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the screws that secure the hard drive to the computer.
5. Slide and remove the hard drive out of the computer.
6. Remove the screw that secures the hard drive caddy to the hard drive.
7. Pull and remove the hard drive caddy away from the hard drive.

Replacing the Hard Drive

To replace the hard drive, perform the above steps in reverse order.
Removing the Heat Sink and Processor Fan

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the access panel.
5. Remove the coin-cell battery.
6. Disconnect the fan cable from the system board.
7. Loosen the captive screws on the heat sink.
8. Lift the edge of the heat sink that is closest to the center of the computer, and then slide the heat sink out of the computer.

Replacing the Heat Sink and Processor Fan

To replace the heat sink and processor fan, perform the above steps in reverse order.
Removing the Hinge Covers

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the screws that secure the hinge covers to the computer.
5. Slide the hinge covers toward the back of the computer and remove the hinge cover.

Replacing the Hinge Covers

To replace the hinge covers, perform the above steps in reverse order.
Removing the IEEE 1394 Port

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the SIM card.
5. Remove the SD card.
6. Remove the ExpressCard.
7. Remove the Smart card.
8. Remove the hinge covers.
9. Remove the access panel.
10. Remove the optical drive.
11. Remove the hard drive.
12. Remove the LED cover.
13. Remove the keyboard.
14. Remove the coin-cell battery.
15. Remove the memory.
16. Remove the WWAN card.
17. Remove the WLAN card.
18. Remove the Latitude On™ Flash/CMG module.
19. Remove the Fingerprint Reader.
21. Remove the Display Assembly.
22. Peel back the Ferrite sheet covering the firewire cable.
23. Disconnect and unthread the firewire data cable from the system board.
24. Remove the screws that secure the IEEE 1394 board to the computer.
25. Remove the IEEE 1394 board from the computer.

Replacing the IEEE 1394 Port

To replace the IEEE 1394 port, perform the above steps in reverse order.
Removing the I/O port card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG port cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the optical drive.
5. Remove the hard drive.
6. Remove the hinge covers.
7. Remove the access panel.
8. Remove the coin-cell battery.
9. Remove the Heat Sink and Processor fan.
10. Remove the LED cover.
11. Remove the keyboard.
12. Remove the display assembly.
13. Remove the palm rest.
14. Remove the modem.
15. Remove the modem connector.
17. Remove the palm rest.
18. Remove the system board.
19. Remove the screw that secures the I/O port card to the computer.
20. Lift the left edge of the I/O port card and remove the I/O port card from the computer.

Replacing the I/O port card

To replace the I/O port card, perform the above steps in reverse order.
### Removing the Keyboard

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG port cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the LED cover.
5. Remove the screws that secure the keyboard to the computer.
6. Use a plastic tab to lift the back edge of the keyboard to release the keyboard.
7. Slide the keyboard toward the back of the computer and remove the keyboard from the computer.

### Replacing the Keyboard

To replace the keyboard, perform the above steps in reverse order.
Removing the Latitude ON Flash/CMG Module

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG port cover (applicable on E6410 ATG computer only).
3. Remove the left hinge cover. (See Removing Hinge Covers).
4. Remove the screw that secures the Latitude ON Flash/CMG module.
5. Remove the Latitude ON Flash/CMG module.

Replacing the Latitude ON Flash/CMG Module

To replace the Latitude ON Flash/CMG Module, perform the above steps in reverse order.

NOTE: You may need to install Adobe® Flash® Player from Adobe.com in order to view the illustrations below.
Removing the LED Cover

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Gently pry up one end of the LED cover and remove it.

Replacing the LED Cover

To replace the LED cover, perform the above steps in reverse order.
Removing the Memory Module

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the access panel.
5. Spread apart the securing clips on each end of the memory module connector until the memory module pops up.
6. Slide and remove the memory module out of the socket.

Replacing the Memory Module

To replace the memory module, perform the above steps in reverse order.
Removing the Modem

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the LED Cover.
5. Remove the keyboard.
6. Remove the screw that secures the modem to the computer.
7. Using the Mylar tab lift the modem up slightly, and then slide the modem out of its slot.
8. Disconnect the modem cable from the modem to remove the modem from the computer.

Replacing the Modem

To replace the modem, perform the above steps in reverse order.
Removing the Modem Connector

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the Memory.
5. Remove the ExpressCard.
6. Remove the optical drive.
7. Remove the hard drive.
8. Remove the hinge covers.
9. Remove the access panel.
10. Remove the Latitude ON™ Flash/CMG Module.
11. Remove the WWAN card.
12. Remove the WLAN card.
13. Remove the coin-cell battery.
14. Remove the LED cover.
15. Remove the keyboard.
16. Remove the fingerprint reader.
17. Remove the display assembly.
18. Remove the ExpressCard cage.
19. Remove the palm rest.
20. Remove the system board.
21. Unthread the modem connector cable from the computer.
22. Lift the modem connector out of its slot and remove.

Replacing the Modem Connector

To replace the modem connector, perform the above steps in reverse order.
Removing the Modem Plug

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG port cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Insert a pin it into the modem plug eject hole on the modem port plug to release and remove the snap securing it.

Replacing the Modem Plug

To replace the modem plug, perform the above steps in reverse order.
Removing the Optical Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the screw that secures the optical drive to the computer.
4. Press and release the optical drive latch.
5. Pull the optical drive out of the computer.

Replacing the Optical Drive

To replace the optical drive, perform the above steps in reverse order.
Removing the Palm Rest

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the SIM card.
5. Remove the SD card.
6. Remove the ExpressCard.
7. Remove the Smart Card.
8. Remove the hinge covers.
9. Remove the access panel.
10. Remove the optical drive.
11. Remove the hard drive.
12. Remove the LED cover.
13. Remove the keyboard.
14. Remove the coin-cell battery.
15. Remove the memory.
16. Remove the WWAN card.
17. Remove the WLAN card.
18. Remove the Latitude ON™ Flash/CMG module.
19. Remove the coin-cell battery.
20. Remove the fingerprint reader.
21. Remove the Heat Sink and Processor Fan.
22. Remove the Display Assembly.
23. Remove the 8 screws (Number 1 is a captive screw) from the bottom of the computer.

**NOTE:** If the computer is installed with a standard palm rest, see the fingerprint reader removal instructions from step 8 to loosen the 9th screw which is a captive screw.

24. Remove the screws that secure the palm rest to the computer.

25. Disconnect the speaker cable (1), power button cable (2), touch pad cable (3), and RFID cable (4).

**NOTE:** RFID cable is available only if your computer is purchased with contactless smart card solution.

26. Lift the back edge of the palm rest and pull on the right side to release the right snaps. Once the right snaps release, pull the palm rest forward along the front to release the front snaps and remove the palm rest.

Replacing the Palm Rest

To replace the palm rest, perform the above steps in reverse order.
Removing the Power Connector

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the Memory.
5. Remove the ExpressCard.
6. Remove the optical drive.
7. Remove the hard drive.
8. Remove the hinge covers.
9. Remove the access panel.
10. Remove the Latitude ON™ Flash/CMG module.
11. Remove the WWAN card.
12. Remove the WLAN card.
13. Remove the coin-cell battery.
14. Remove the LED cover.
15. Remove the keyboard.
16. Remove the Fingerprint Reader.
17. Remove the Display Assembly.
18. Remove the ExpressCard cage.
19. Remove the palm rest.
20. Remove the system board.
21. Unthread the power source cable from the computer.
22. Lift up the power source port to remove from the computer.

Replacing the Power Connector

To replace the power connector, perform the above steps in reverse order.
Removing the Processor

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the access panel.
5. Remove the Heat Sink and Processor fan.
6. Rotate processor cam lock counter clockwise.
7. Lift the processor and remove it from the computer.

Replacing the Processor

To replace the processor, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

NOTE: You may need to install Adobe® Flash® Player from Adobe.com in order to view the illustrations below.
Removing the SD Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Press in on the SD card and release the SD card.
3. Pull and remove the SD card out of the computer.

Replacing the SD Card

To replace the SD card, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

NOTE: You may need to install Adobe® Flash® Player from Adobe.com in order to view the illustrations below.
Removing the SD Card Reader

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the Memory.
5. Remove the ExpressCard.
6. Remove the optical drive.
7. Remove the hard drive.
8. Remove the hinge covers.
9. Remove the access panel.
10. Remove the Latitude ON™ Flash/CMG Module.
11. Remove the WWAN card.
12. Remove the WLAN card.
13. Remove the coin-cell battery.
14. Remove the LED cover.
15. Remove the keyboard.
16. Remove the fingerprint reader.
17. Remove the display assembly.
18. Remove the ExpressCard cage.
19. Remove the system board.
20. Disconnect the SD card reader cable from the system board.
21. Lift the 2 hooks while pulling the smart card reader to the right of the computer.
22. Remove the smart card reader from the computer.

Replacing the SD Card Reader

To replace the SD card reader, perform the above steps in reverse order.
Removing the SIM Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Press and release the SIM card.
5. Slide and remove the SIM card out of the computer.

Replacing the SIM Card

To replace the SIM card, perform the above steps in reverse order.
Removing the Smart Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Pull and remove the smart card out of the computer.

Replacing the Smart Card

To replace the smart card, perform the above steps in reverse order.
Removing the System Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG port cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the SIM card.
5. Remove the SD card.
6. Remove the ExpressCard.
7. Remove the Smart card.
8. Remove the hinge covers.
9. Remove the access panel.
10. Remove the optical drive.
11. Remove the hard drive.
12. Remove the LED cover.
13. Remove the keyboard.
14. Remove the coin-cell battery.
15. Remove the memory.
16. Remove the WWAN card.
17. Remove the WLAN card.
18. Remove the Latitude ON™ Flash/CMG module.
19. Remove the Fingerprint Reader.
20. Remove heat sink and processor fan.
21. Remove the Display Assembly.
22. Remove the palm rest.
23. Disconnect the power connector from the system board.
24. Disconnect the smart card reader and IEEE 1394 cables from system board.
25. Remove the screws that secure the system board to the computer.
26. Starting in the back right corner and separate the system board from the I/O board connector.
27. Lift the back edge of the system board until all the connectors on the left side are separated and slide the system board towards the rear and remove from the computer.

Replacing the System Board

To replace the system board, perform the above steps in reverse order.
Removing the WLAN Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the access panel.
5. Disconnect the antenna cables from the WLAN card.
6. Remove the screw that secures the WLAN card to the computer.
7. Remove the WLAN card from the computer.

Replacing the WLAN Card

To replace the WLAN card, perform the above steps in reverse order.
Removing the WWAN Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the ATG Port Cover (applicable on E6410 ATG computer only).
3. Remove the battery.
4. Remove the access panel.
5. Disconnect any antenna cables that may be connected to the WWAN card.
6. Remove the screw that secures the WWAN card in the computer.
7. Remove the WWAN card from the computer.

Replacing the WWAN Card

To replace the WWAN card, perform the above steps in reverse order.
Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- Ensure that you have performed all the steps specified in this section.
- You have read the safety information that shipped with your computer.
- A component can be replaced or—if purchased separately—installed by performing the removal procedure in reverse order.

**WARNING:** Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at [www.dell.com/regulatory_compliance](http://www.dell.com/regulatory_compliance).

**CAUTION:** Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

**CAUTION:** To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

**CAUTION:** Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

**CAUTION:** When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

**NOTE:** The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning Off Your Computer).
3. If the computer is connected to a docking device (docked), undock it.
4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Where applicable, disconnect any adapters from the computer.
7. Close the display and turn the computer upside-down on a flat work surface.
8. Turn the computer top-side up.
9. Open the display.
10. Press the power button to ground the system board.
11. Remove any installed ExpressCards or Smart Cards from the appropriate slots.
12. Remove the hard drive.

**CAUTION:** To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.

**CAUTION:** To avoid damaging the system board, you must remove the main battery before you service the computer.

**CAUTION:** To guard against electrical shock, always unplug your computer from the electrical outlet before opening the display.

**CAUTION:** Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.

**NOTE:** The color of your computer and certain components may appear differently than shown in this document.

**CAUTION:** To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

Recommended Tools

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- #0 Phillips screwdriver
- #1 Phillips screwdriver
- Small plastic scribe
1. Shut down the operating system:
   - In Windows 7®:
     Click Start and click Shut Down.
   - In Windows Vista®:
     Click Start, then click the arrow in the lower-right corner of the Start menu as shown below, and then click Shut Down.
   - In Windows® XP:
     Click Start → Turn Off Computer → Turn Off. The computer turns off after the operating system shutdown process is complete.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off.

---

After Working Inside Your Computer

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

⚠️ **CAUTION:** To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator, battery slice, or media base, and replace any cards, such as an ExpressCard.
2. Connect any telephone or network cables to your computer.

⚠️ **CAUTION:** To connect a network cable, first plug the cable into the network device and then plug it into the computer.

3. Replace the Battery.
4. Connect your computer and all attached devices to their electrical outlets.
5. Turn on your computer.
