How to use the CCCCO Management Information Systems Data Mart
The Chancellor's Office of the California Community College System collects enrollment, demographic, and other student data from all its constituent institutions within 30 days after the end of each term. These data may be accessed via the Management Information System (MIS) Data Mart at the college, district, and statewide levels by term and academic year.

The Data Mart contains several pre-defined reports that are available to the public. It allows for the easy development of these reports, and the download of aggregate data in comma-delimited files for analysis and longitudinal tracking. Usually one or more criteria (for example: student age category, gender, enrollment status, ethnicity, or instructional discipline) can be used to group the output data on the reports.
